

**PEEL LONG TERM CARE
RESIDENTAL SERVICES
COMMITTEE**

PILOT PROJECT

WHO ARE WE?

A group of individuals representing:

- Community Living Organizations
- Long Term Care Facilities in Peel
- The Region of Peel
- C.C.A.C.
- MCSS
- MOHLTC

WHY DID WE FORM?

- Community Living Organizations recognized that the care needs of some aging persons with a developmental disability could not be met in the community.
- Community Living Organizations were experiencing difficulties coping with these emerging needs.
- Recognition that Persons with a developmental disability had the same rights as other citizens to access LTC.

WHY DID WE FORM?

- Community Living Organizations felt that Persons with a developmental disability should be accessing resources in long Term Care if warranted.
- Long Term Care in Peel was faced with a surplus of 'beds.'
- This created a unique opportunity to develop a mutually beneficial partnership between the sectors.

INTENT OF THE PROJECT

To develop a model that would ease the transition of persons with a developmental disability into Long Term Care while taking into account their unique needs and interests.

CHARACTERISTICS OF THE PROJECT

- Collaboration to meet the needs of the person with a developmental disability.
- Responsive supports.
- Continuity in support between sectors.
- Shared resources.
- Shared knowledge and understanding between sectors.
- To provide a 'quality of life.'
- Person focused service.
- Seamless support model.

WHAT DID WE DO?

- In May 2003 representatives from both sectors met to discuss how to promote access of persons with a developmental disability into Long Term Care.
- Other representatives from both sectors, CCAC, Region of Peel and the two ministries were subsequently invited to join.
- Working groups were developed to work on key components of the project

WHAT DID WE DO?

- We held two planning sessions involving representatives from both sectors and CCAC using the 'Project Logic' model to develop a proposal to be submitted to MCSS for funding.
- Made the decision that 10-16 persons will have the opportunity to participate in the pilot project.

WHAT DID WE DO?

- Once the prospective participants were deemed by CCHC to be eligible for Long Term Care then each would have the opportunity to choose from available spaces in Malton Village, a new Long Term Care Facility in Malton.
- Work continued on the components and the project was launched at the beginning of July 2004.

PILOT PROJECT TERMS OF REFERENCE

Purpose

To support people with a developmental disability to lead enriched and meaningful lives in Long Term Care in partnership with their families and the community.

Decision Making

Consensus model.

PILOT PROJECT TERMS OF REFERENCE

Governance

Pilot project steering committee comprised of representatives from both sectors including co chairs-one from each sector.

Term of appointment

Eighteen months

Financial Resourcing

MCSS For the project. MHLTC for beds and office space for the coordinator.

PILOT PROJECT TERMS OF REFERENCE

Accountability

- Through MCSS.
- Malton Village (LTC) Director of Care.
- Peel Planning Group.

Staffing

- One full-time Project Coordinator (roles and responsibilities defined in proposal).

PILOT PROJECT TERMS OF REFERENCE

Evaluation

- Identification of best practices.
- Evaluation of client and family satisfaction.
- Develop an understanding of what works and what does not work and compare with persons in LTC not a part of the pilot project.

SOME PRELIMINARY BEST PRACTICES

- Orientation of LTC staff to value-based issues relating to persons with a developmental disability.
- Training of LTC staff to unique behavioral issues.
- Participation of family members and Support Workers from Developmental Services in the complete transition process and individual planning with the person.

SOME PRELIMINARY BEST PRACTICES

- Identifying and dispelling myths about persons with a developmental disability and the Long Term Care Home by:
 - Offering tours of Malton Village to Support Workers as well as family members.
 - Providing information packages that include information on the transition process.
 - Generating information sessions or forums for individuals, their families and Support Workers considering Long Term Care for those they care about.

SOME PRELIMINARY BEST PRACTICES

- Implementing off-site training to other prospective LTC facilities after the pilot project.
- Generating on-going partnerships between developmental service organizations and LTC facilities.
- Generating partnership between CCAC and LTC to lengthen the assessment and admission process because persons with a disability may take longer to adjust.

SOME PRELIMINARY BEST PRACTICES

- Information session for family and Support Workers regarding the capacity to consent.
- Implementation of surveys for continuous quality improvement for participants of the pilot project to monitor a person's satisfaction.
- Inclusion of students in the developmental service sector placements in Malton Village.
